RICKSON LIVIO DE SOUZA GASPAR

Staff AI & MLOps Engineer building agents and production ML, from data lakes to GPU-optimized models. Always learning, always testing the latest tech, and a proud dog dad.

HARD SKILLS

Programming
Python - Advanced
R - Expert
SQL - Advanced
DAX - Advanced
PySpark - Intermediate

Cloud Experience
Google Cloud Platform (GCP) - Advanced
Snowflake - Intermediate
AWS - Intermediate
Azure - Intermediate

Software & Frameworks
Power BI - Advanced
Docker - Intermediate
Git/GitHub - Intermediate
Alteryx - Intermediate
Databricks - Intermediate
Airflow - Intermediate

Analysis & Modelling Skills
Clustering and Regression - Expert
Machine Learning - Advanced
Deep Learning - Intermediate
Computer Vision - Intermediate
Time Series and Forecasting - Advanced
ETL/ELT - Expert
Storytelling with Data - Advanced
Data Architecture - Advanced

Languages
Portuguese - Fluent/Native
English - C2 Proficient

CERTIFICATES

Computer Vision: Facial Analysis
Data Warehouse - Snowflake
Machine Learning Solutions on Vertex AI
EF SET English Certificate (C1 Advanced)

WORK HISTORY

Dec 2025 - Present
Nuvidio
Staff AI & MLOps Engineer
→ Train models for spoofing detection, deepfake detection and lip-sync;
→ Created and structured the AI and Data Science area, including a GCP data lake for CI/CD model training and team data;
→ Model inference speed optimized with CUDA and ONNX, applied to state-of-the-art (SOTA) models.

Jul 2024 - Dec 2025
Cognitivo.AI
Senior Data Scientist
→ Built demand forecasting per product and store for Petz Group (Prophet, ARIMA, deep learning with zero-inflated negative binomial; PySpark, Databricks, Snowflake);
→ Developed WhatsApp product-search AI agents (LangGraph, Snowflake Cortex) and used Whisper to extract demand from customer audio;
→ Served models and LLM pipelines with FastAPI, built Streamlit dashboards, tracked code and models with GitHub and MLflow;
• Saved R$250,000 per quarter in supply and increased WhatsApp conversion by 10%.

Oct 2024 - Jan 2025
Globo
Senior Data and ML Engineer
→ Fine-tuned Gemini (Vertex AI) to classify user comments, with an automated GCP pipeline (Docker, Cloud Run) for daily processing.

Apr 2023 - Jul 2024
Sólides Tecnologia
Mid-level Data Scientist
→ Built ETL from PostgreSQL, MySQL (Psycopg2) and APIs (Requests) into GCP;
→ Churn model with survival analysis (pysurvival), deployed with Docker and Streamlit with the MLOps team;
→ OpenAI-based virtual assistant (persona and prompt engineering) integrated into the company website;
→ Facial analysis (OpenCV, TensorFlow, Keras) and speech analysis (SpaCy) models for HR hiring reports;
• Cut monthly churn from 10% to 4%.

Mar 2022 - Feb 2023
Tecla T
Mid-level Data Engineer
→ ETL solutions for Grupo Mateus and Hapvida Group with Databricks and PySpark on 80+ billion row tables.

Aug 2021 - Feb 2022
Conjecto.AI
Data Scientist
→ KPIs and Power BI analytics for Iguatemi mall from PostgreSQL on AWS and Google Calendar APIs;
→ Revenue forecasting (Statsmodels, Prophet) and fraud outlier detection (Gaussian Mixture, Isolation Forest).

Feb 2020 - Aug 2021
Somapay
Data Scientist I
→ Migrated databases from MySQL to PostgreSQL on AWS and ran A/B tests for marketing;
→ Credit time-to-payment modeling with survival analysis.

EDUCATION

03/2017 - 03/2023
Federal University of Ceará
Bachelor's Degree in Statistics

03/2025 - 03/2027
Federal Institute of Ceará
Master's Degree in Computer Science Applied to AI
